INTRODUCTION

The appendix to the budget contains information on personal services, broken down by grade and title, in accordance with the provisions of section 204 of the Budget and Accounting Act, 1921, as amended (31 U. S. C. 581).

Schedules are shown in this appendix in the same order as in the budget.

An explanatory illustration of the schedules is shown below.

Departmental (central office) and field employment are shown in two separate sections of the schedule.

Titles are shown for positions with a base rate of \$5,440 or above.

This line represents the difference between the annual rates for the position and the base pay actually earned for 52 weeks. It covers savings due to vacancies, leave without pay, etc., offset in part by terminal leave payments.

Where employees are stationed in foreign countries, data are shown separately for those paid at U. S. rates and those paid at local rates. U. S. rates are those regularly established for employees hired in the United States and stationed abroad; other rates are local rates.

Salaries are reported at the rate effective for the greater part of the year. Employees generally are entitled to within-grade salary advancements, effective after 12 or 18 months of service. The difference between the rate shown and the exact rate for the year is shown in the lapse line.

This total indicates the number of full-time positions of permanent or indefinite duration, which are occupied or to be occupied at any time during the year. They include positions which may be filled by persons with temporary appointments, if the positions themselves are of a continuing nature. The number of positions is nearly always larger than the number of employees at any one time, due to delays in filling vacancies. The sum of these entries for the departmental and field sections of the schedule equals the total number of permanent positions shown at the top of the object schedule.

Because an increase in pay rates was effective for less than half of 1955, salary rates shown in this column are based on the previous pay scales, although the rates shown in the stub column are those currently in effect. The cost of the pay increase in 1955 is reported as a separate entry at the end of the schedule.

In order to avoid duplication, the numbers of positions and employees exclude employees on detail from another agency, even where the detail is on a reimbursable basis. The other agency involved includes employees on reimbursable detail in its position schedule in the usual manner. Payments for such reimbursements, as well as any payments for personal services to persons who are not regularly reported as Government employees, are reported under an entry "Other payments for personal services" (not illustrated here).

The amounts shown on this line agree with the entry total personal services on the schedule of obligations by objects. In cases where a consolidated schedule contains personal services reflected in two or more object schedules, a distribution by schedule title follows the total line.
